The granting of the Petition to Correct Inventorship in the parent application is noted.

The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

5 The oath or declaration is defective because:

The oath or declaration does not include the additional inventors added by petition.

Applicants' election without traverse of Group I, claims 1 and 33-44 in Paper No. 7 is acknowledged. In addition, applicants request clarification with regards to the grouping of claim 34. Claim 34 will be examined with Group I.

10 Claims 2-8, 11, 12, 14 and 21-23 were previously cancelled.

Claims 9, 10, 13, 15-20, 24-32 and 45-59 are withdrawn from consideration

Upon further review of the claims, the following supplemental restriction to Group I is set forth.

15 ***Supplemental Restriction***

Applicants are reminded that nucleotide sequences encoding different proteins are structurally distinct chemical compounds and are unrelated to one another. These sequences are thus deemed to normally constitute **independent and distinct** inventions within the meaning of 35 U.S.C. 121. Absent evidence to the contrary, each such nucleotide sequence is presumed to  
20 represent an independent and distinct invention, subject to a restriction requirement pursuant to 35 U.S.C. 121 and 37 CFR 1.141 et seq.

Applicant is additionally required to select a single nucleotide sequence selected from SEQ ID Nos: 1, 3, 5, 7, 9, 11 or 15. This requirement is not to be construed as a requirement for an election of species, since each nucleotide and amino acid sequence is not a member of single genus of invention, but constitutes an independent and patentably distinct invention.

5

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, their recognized divergent subject matter, and the requirement for different areas of search, restriction for examination purposes as indicated is proper.

10

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

15

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
